Furniture Brochure

2017

We are excited to present our 2017 furniture collection that we designed by heart believing in connecting our legacy with the future.

We have considered every piece, detail and function to suit our aim “ *Architecture is a generations’ message*” .

Co-operating with *SALEM ART Egyptian Furniture* (one of the talented art crafter in Egypt) we decided to develop a new theme for oriental and contemporary pieces of furniture to create a unique outstanding collection .

” We connect Our Legacy with Future ”

WHO WE ARE

ABOUT US

ADEEM is a highly caliber & professional entity that specializes in Architectural ,Urban sustainable- appropriate designs and interior designs. We believe that the construction process within our local communities is not just an industrial matter that is subjected to physical standards in terms of quality, profit and loss. Rather, we think of it as a truly expression of the so called: *"The genius of the place "*.

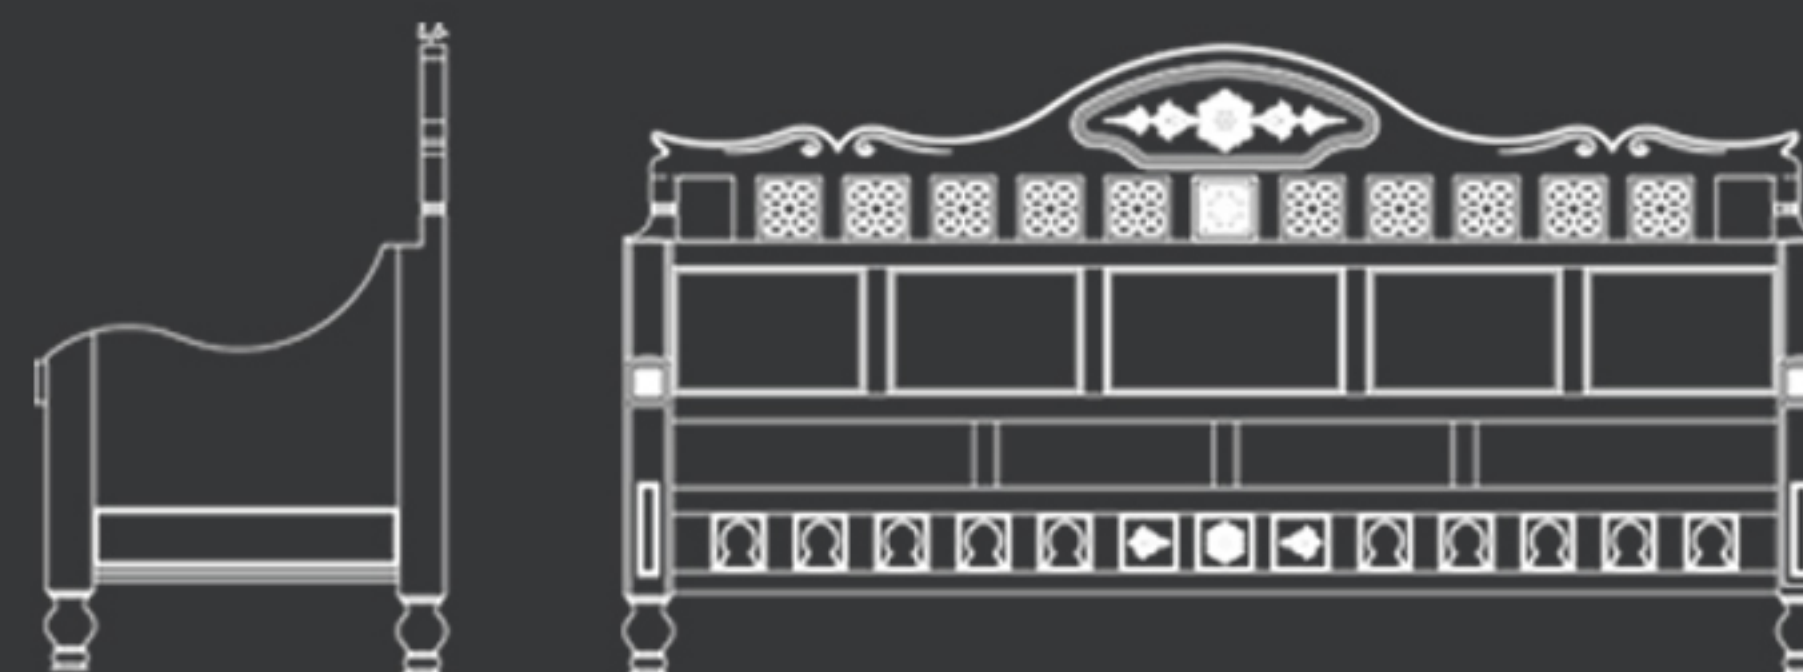

It is an embodiment of a human society life moment. That moment may remain for decades to reveal its secrets for coming generations. In our beliefs, *"Architecture"* is a message we carry carefully and keenly rather than a mission or a job. We do exert the at-most time and effort to participate in the creation of a high-value built environment that genuinely reflects the special features of our contemporary communities.

Oriental and contemporary compositions meet in this Majles producing striking contemporary pieces of furniture decorated by oriental decorative details forming a harmonic image of the past and future
